

Cup-wall trajectories · 320 × 192 neural processing

1920 × 1080 full references and 960 × 540 historical half references · same scaled, unaligned scene region

Original Identity Enhanced

Linear BT.2020 $Y = 0.2627R + 0.6780G + 0.0593B$. Identity overlaps original at this scale.
All 30 timestamps per reference retained; axes share limits by column. Shaded bands mark each largest E-O pair.

No motion compensation, adaptive mask or photometric normalization. No perceptual acceptance or physical HDR claim.
Reference geometry differs; neural processing is 320 × 192 in both captures. Enhanced equality across geometries is not expected.
